

Five Senses Nature Walk

Kruckeberg
Botanic Garden

Did you know you can explore nature using all **five senses**?

Talk a walk through Kruckeberg Botanic Garden, your neighborhood, or even your own backyard. Try to explore your surroundings just like animals do- with their senses. Write or draw what you notice using each your five senses.

I SEE...

Owls use their sharp eyesight to catch their food- even at night!

I HEAR...

Deer listen for danger with their large ears.

I FEEL...

A raccoon's sensitive hands help them find food and climb trees

I SMELL...

Dogs have powerful noses to smell and find food

I TASTE...

Snakes gather information about their surroundings by tasting the air
